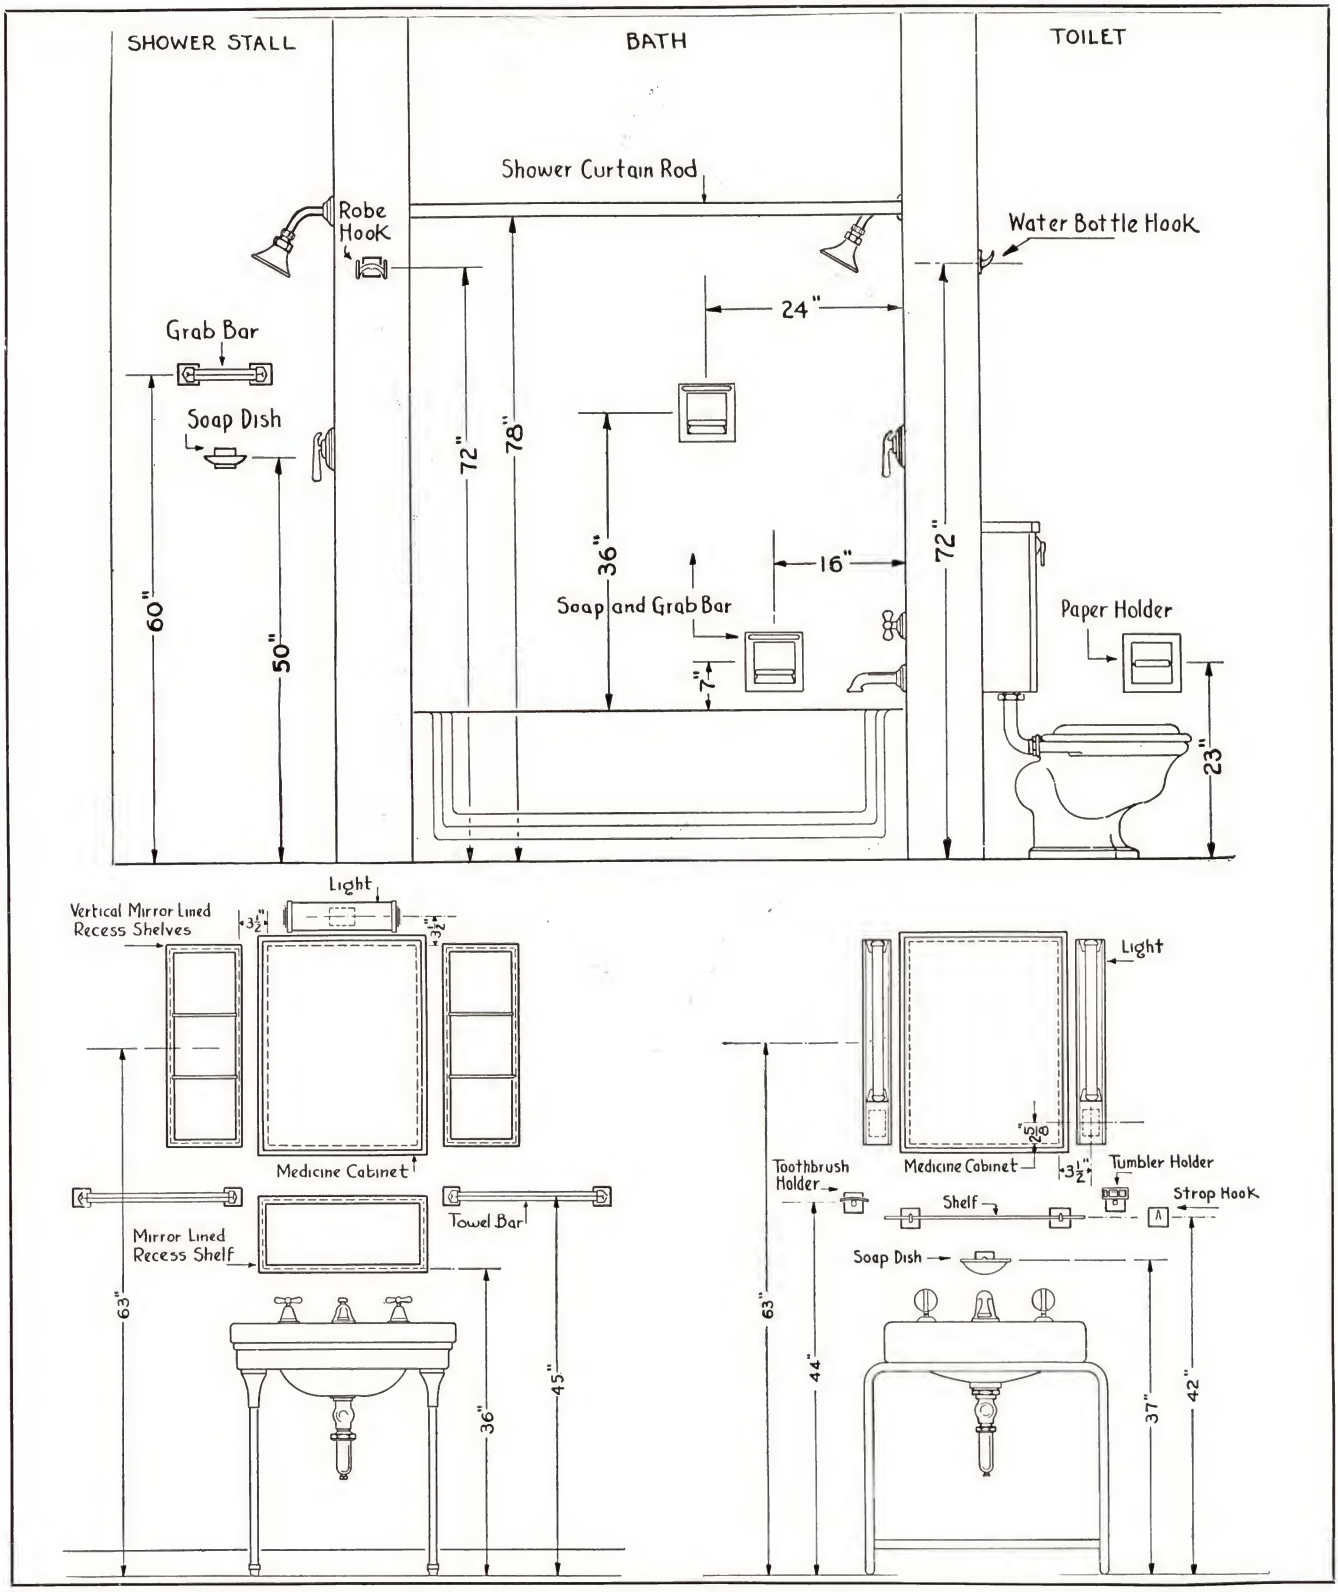
HOEGGER Mounting Heights and Specifications HOEGGER

SPECIFICATION

All bathroom accessories, mirrors and medicine cabinets shall be those manufactured by Hoegger, Inc., Weehawken, New Jersey, and unless written consent is given by the architect or/and owner, no substitutions shall be made.

Hoegger Suggests these Mounting Heights for Your Convenience



HOEGGER Installation Data, Prices & Deliveries HOEGGER

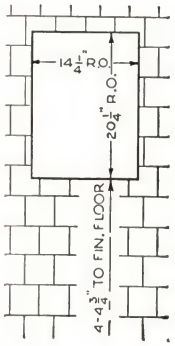
HOEGGER PATENTED RECESS CABINETS SHOULD NOT BE PLASTERED IN THE WALL.

LEAVE HOLE IN WALL EXACTLY AS INDICATED IN LITERATURE.

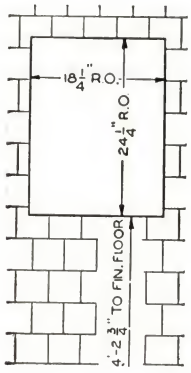
FINISH WALL **LEVEL** TO EDGE OF OPENING.

CABINET IS HELD IN WALL BY FOUR WOOD SCREWS THROUGH SIDES OF RECESS CASE.

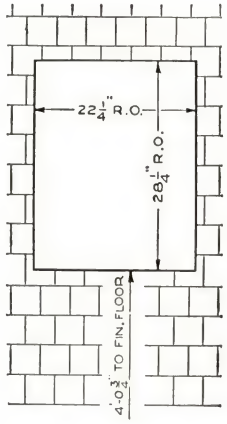
Please do not install cabinets until room is completely decorated and ready for occupancy.



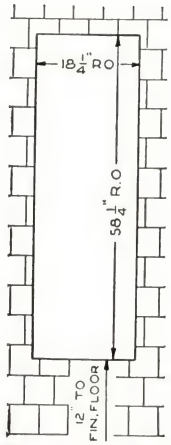
For Cabinets 43, 44, 46, 50, ST-50, 61, 75, ST-75, 272, 277, 292, 296



For Cabinets 40, 45, 47, 49, 51, ST-51, 62, 74, 76, ST-76, 273, 278, 293, 297



For Cabinets 63, 274, 294



For Cabinets 65, 279

If cabinet door overhangs case, center of mirror should be 63" from finished floor.

Mounting Features HOEGGER ACCESSORIES

(Patent No. 1636364)

HOEGGER surface applied accessories consist essentially of two parts, the fixture proper and the solid brass concealed back plate. The back plates are made in several types to facilitate mounting on the various kinds of wall construction. The fixture is rigidly secured to the back plate by a single concealed set screw which is regularly furnished slotted for screw driver, but where fixtures are used in public places, a special theft-proof set screw will be furnished when specified.

Advantages of HOEGGER Concealed Plate type mounting are:

(1) They are easily and quickly installed in any type of wall construction.

(2) The back plates may be shipped to the job and installed in advance, as the fixtures are not attached until the rooms are completely decorated, thus eliminating any possible loss from theft or injury.

(3) Fixtures may be easily removed whenever it is necessary to redecorate the room.

(4) Due to the construction of the patented back plate post the fixture is forced tightly against the wall surface when set screw is tightened, thus assuring a neat, tight-fitting assembly that will not work loose.

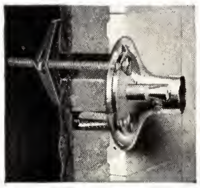
HOEGGER Concealed Back Plates are made in several types to meet the various conditions in wall construction:

"S" Type—(Supplied with fixtures.) Can be mounted on any type of wall. This is our regular plate and is shipped with all fixtures unless otherwise specified.

"SA" Type—(Supplied with fixtures.) "Anker-in" plate set in wall with plaster of paris. Anchors made in two lengths—1¼ in. long for tile or marble walls and 2¼ in. long for cement or plaster walls.

"B" Type—Wall anchor bar—made for new work only where tile or glass walls are erected. The brass lugs drilled to receive the regular "S" plates are mounted on a ⅛x1 in. galvanized bar which is placed in the wall during its erection.

All fixtures except 513 and 518 are interchangeable on all HOEGGER back plates.



Concealed Screw (S) Type Plate

Installing Directions

On Wood—Use inclosed wood screws.

On Tile—Use inclosed wood screws and lead shields.

On Plaster—Use inclosed wood screws and rawl plugs or toggle bolts.

Note: Plate may be fastened by top screw only, fixture put on and adjusted as required, then fixture carefully removed and hole drilled for bottom screw.

Installing Directions for Hoegger Concealed Plates

(Patent No. 1636364)

All HOEGGER Concealed Plates are mounted so that lug is on top (Fig. 1). This lug fits in a recess and keeps the fixture from turning on the concealed plates.

Where fixtures require two concealed plates, as towel and grab bars, carefully measure center to center distance of plates from assembled fixture.

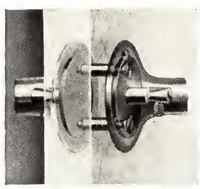
Note: Where conditions warrant, a templet will be furnished for all double plate fixtures.

Important When Ordering

If Anker-in type of wall fastening is wanted add "A" to the letter already following the catalogue number and designate the length of anchor required. If concealed screw type is wanted use the catalogue number as shown.

Left:
"S" Type Plate Mounted on Marble with Chromium Plated Buttons and Screw

Right:
"S" Type Plates Mounted Back to Back on Marble with Sleeves and Screws



Important: Drill holes vertically 1⅛ in. center to center.

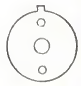


Fig. 1 A

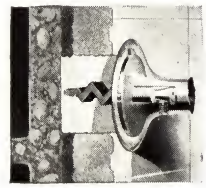

Anker-in (SA) Type Plate

Installing Directions

Cut hole in wall ¾ in. in diameter, 1½ in. deep for short anchor plates used on tile or marble walls, and 2½ in. deep for long anchor plates used on cement, plaster or glass walls. Fill hole with plaster of paris, placing some on anchor, and insert with lug at top (Fig 1). Hold until set—a few seconds.

Important: Fixtures should not be put on plates for at least one hour or preferably after room is decorated and ready for occupancy.

Hoegger Wall Anchor Bars

(Patent applied for)

Wall Anchor Bar Used for Mounting Double Post Fixture

This type of wall anchorage was developed for large installations such as hotels, office buildings, apartments, schools, etc.

Can be used on new work only, as bars must be installed as tile wall is laid.

In addition to spacing for double post fixtures they assure that the fixtures will be level as the bars are placed on top of a course of tile nearest the proper height.

Always specify tile thickness when ordering Wall Anchor Bars.

Important When Installing Wall Anchor Bars—Brass lugs must not extend beyond tile surface.

METHOD OF INSTALLING TYTESET ACCESSORIES

Fasten concealed mounting plate to Wall (Fig. 1). Place wall shield over stud (Fig. 2). Attach fixture to stud with concealed set screw (Fig. 3), which draws three pieces together.

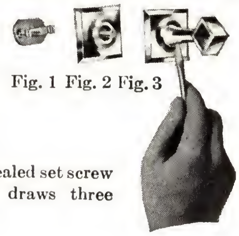

Fig. 1 Fig. 2 Fig. 3

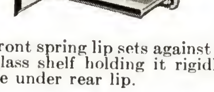
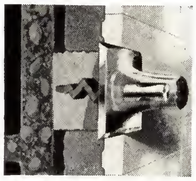
SPRING LIP SHELF BRACKET
(Patent 1779236)



Front spring lip sets against edge of glass shelf holding it rigidly in place under rear lip.

ANKER-IN (SA) TYPE PLATE



Installing Directions

Cut hold in wall ¾″ in diameter 1½″ deep for short anchor plate, used on tile or marble walls, and 2½″ deep for long anchor plates used on cement, plaster or glass walls. Fill hole with plaster of paris, placing some on anchor, and insert with screw holes level horizontally. Hold until set—a few seconds.

Important: Fixtures should not be put on plates for at least one hour or preferably after room is decorated and ready for occupancy.

HOEGGER DOUBLE CURTAIN TRAVERSE RODS SHOWERS DRAPERIES HOEGGER

(Patent No. 2049061—Other Patents Pending)

NEW—DUPLEX OVERLAPPING CURTAIN RODS AND VERTICAL WALL CURTAIN CHANNELS

For Watertight Shower Compartments

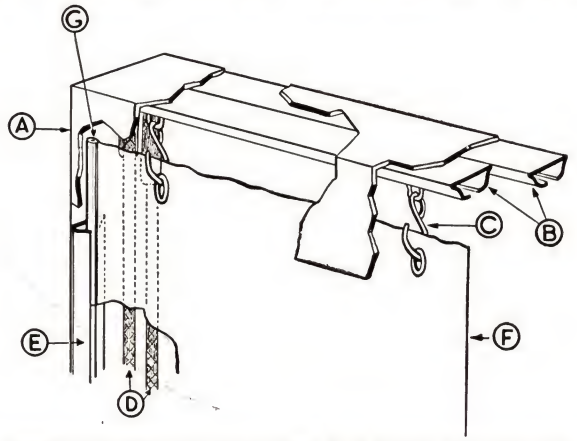
The curtain is securely fastened against the side wall by a turned welt in curtain edge inserted into a vertical wall channel as illustrated. Makes a watertight joint and splash proof compartment.

Tracks are chromium plated brass. They are concealed by a metal apron extending the full width of the compartment. Securely supported by adjustable bracket at each end.

Curtains are suspended by hook-carriers sliding in the tracks. They are operated by pull cords or manually. Curtains overlap 6 inches in center. Pull cords are conveniently located inside of enclosure. Curtains are easily removed for laundering.

These Double Curtain Traverse Rods are attractive and inconspicuous. A slight pull operates the heaviest shower curtain.

A—Metal Angle—Supports and conceals track and hooks.
B—Double Track—Permits curtains to overlap.
C—Curtain Hooks—Operated by pull cord "D."
D—Pull Cord—Opens and closes curtains.
E—Vertical Wall Channel—Holds entire edge of curtain tightly to wall.
F—Shower Curtain—With 5/16" welt at edge—inserted in vertical wall channel "E."
G—Cotton Cord—Sewed in vertical edge of curtain to form 5/16" welt—inserted in vertical channel.



Details of Double Curtain Traverse Rods Showing the Concealing Apron and Method of Holding the Shower Curtain Tightly Against the Wall. Also the Operation of the Pull Cords from Inside of the Shower Compartment.

RECESS SHOWER CURTAIN ROD

Chromium Plated Brass—Complete with Adjustable End Brackets and Hooks.

C-346—66"—With Pull Cord.....**$23.50**
C-347—66"—No Pull Cord.....**20.00**

Use two curtains each 4½ ft. wide. Right side of one and left side of other beaded for attaching to C-331 Channel.

CORNER SHOWER CURTAIN ROD

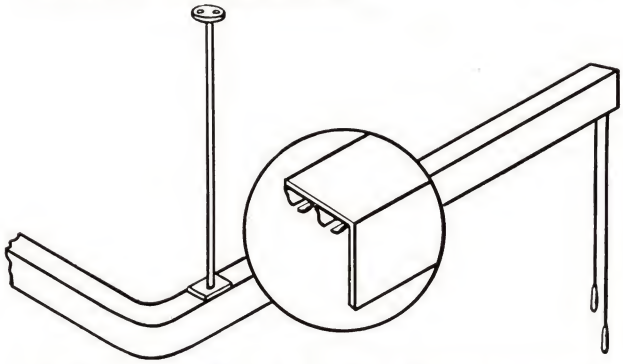
Left or Right—Chromium Plated Brass—Complete with End Brackets, Ceiling Bracket and Hooks.

C-348—25x66"—With Pull Cord.....**$34.50**
C-349—25x66"—No Pull Cord.....**30.75**

Use two curtains each 6 ft. wide. Right side of one and left side of other beaded for attaching to C-331 Channel.

VERTICAL WALL CHANNEL "E"

C-331—Chromium Plated Brass.....**$0.75** ft.
C-335—Aluminum.....**.25** ft.
C-334—Hold Back Chain and Hook.....**1.00** ea.

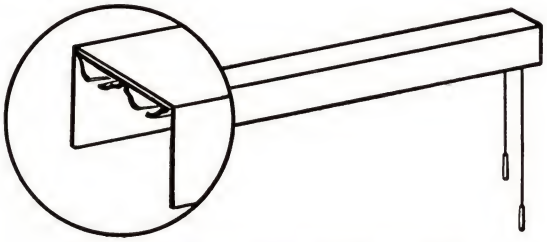


Method of Supporting Curved Traverse Rod from the Ceiling. Also showing the Concealing Apron.

DRAPERY RODS

Hoegger Double Traverse Drapery Rods are smaller and neater than the customary type of drapery device for open or overlapping curtains. They fit any window and are inconspicuous. Operate with or without pull cords.

For curved bay windows they are ideal, as we make specially curved tracks to suit each condition. They are mounted on the ceiling by means of special supports and are fastened to side walls by adjustable brackets. Hooks are completely enclosed.



Drapery Rod with Hooks Entirely Concealed.

DOOR DRAPERY ROD

C-320—Double Track with Double Apron.....**$3.30** ft.
C-321—End Brackets with Pull Cord.....**6.00** pr.
C-305—Hooks—Used, without Pull Cord.....**.06** ea.
C-304—Hooks—Used, with Pull Cord.....**.12** ea.

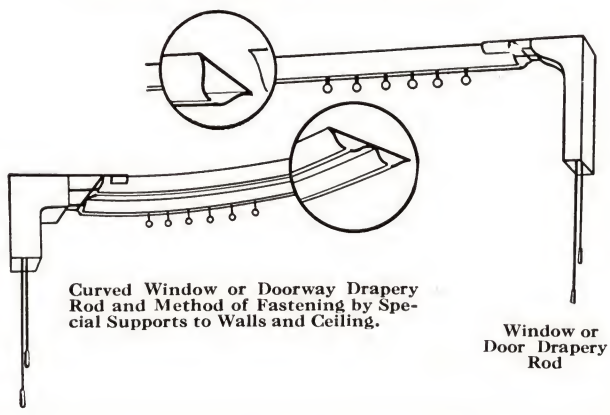
Note: Without pull cords—no end brackets required.

WINDOW OR DOOR DRAPERY ROD

316—Aluminum Track.....**$0.25** ft.
C-317—Chromium Plated Brass Track.....**.75** ft.
C-318—Adj. End Brackets, Inside Mounting, No Pull Cord.....**.30** pr.
C-319—Adj. End Brackets, Surface Mounting, No Pull Cord.....**.50** pr.
C-323—Adj. End Brackets, Inside Mounting, with Pull Cord.....**2.30** pr.
C-324—Adj. End Brackets, Surface Mounting, with Pull Cord.....**2.50** pr.
C-325—Ceiling Bracket.....**.15** ea.
C-305—Hooks—Used, without Pull Cord.....**.06** ea.
C-304—Hooks—Used, with Pull Cord.....**.12** ea.

CURVED WINDOW OR DOORWAY DRAPERY ROD

C-341—Double Chromium Plated Brass Track.....**$1.75** ft.
C-342—End Bracket—No Pull Cord.....**1.00** pr.
C-343—End Bracket—With Pull Cord.....**6.00** pr.
C-344—Ceiling Bracket.....**.25** ea.
C-305—Hooks—Used, without Pull Cord.....**.06** ea.
C-304—Hooks—Used, with Pull Cord.....**.12** ea.



Curved Window or Doorway Drapery Rod and Method of Fastening by Special Supports to Walls and Ceiling.
